EDTV and SDTV ready

An enhanced definition TV (EDTV) receives any digital signal and displays it at 480p. Standard definition TV (SDTV) is a digital television format that includes 480-line resolution in both interlaced and progressively scanned formats.

High quality display

High quality display delivers the very best in high resolution display through the use of outstanding components including a high-end scaler and state-of-the-art 2D combfilter.

Fast response time

Faster response time delivers improved display of video action with faster transitions that dramatically reduce visible image artifacts in the display of fast-moving images.

Multiple AV inputs

Multiple AV inputs accommodate a variety of format choices in connecting video and audio devices (480i/p, 720p, 1080i).

VGA input

VGA input provides a connector to accommodate input of an analog signal for use as a PC monitor.

Smart picture & Smart sound

Smart picture and Smart sound presets are optimized settings for all your favorite types of programs, various display and audio modes that are directly accessed through a single key on the remote control.

Virtual surround sound

Virtual surround sound creates additional audio channels for a theater-like audio experience.
